Print Name: _____

**General Class Activity Grading Rubric**

Deadline: Announced in class per activity

**Grading Criteria:**
Minimum Viable Product (MVP) must include the following:

Properly formatted File Name using the convention: *Lesson # descriptiveTitle*

//Name: ………. at the start of the program (Line 1)

//Description: ………. in paragraph form explaining purpose of code

Programming comments in the code highlighting important sections and variables

Styled single-page webpage created with canvas embedded as required in the activity

Questions asked within the comments/study questions are answered

Task completed and program runs without errors

You can get help from other students but your work must be original. As per school academic honesty policy, copying someone else's work and presenting as your own will earn a score of zero for all parties involved. This includes copying code from the internet.

*I have reviewed and checked the full criteria for the classwork and inquired about anything that was unclear to me. I understand that my grade is reflective of the quality of my work. I also understand that anything submitted after the deadline may only receive 50% credit.*
